02

Diagram showing the motor being attached to the chassis. A green arrow points to the motor's output shaft, which is being connected to the axle of the front wheel.

01

02

This diagram shows the assembly of the claw mechanism onto the base. Two red arrows indicate the placement of the yellow and white claw components onto the top of the base structure. The base is a grey frame with four large black gears and yellow wheels. A yellow and white vertical structure is already attached to the right side of the base.
